

MAHARSH KEWAT

Cybersecurity Student & Aspiring SOC Analyst

Satna, MP | +91 9685920827 | maharshk215@gmail.com | linkedin.com/in/maharsh-kewat01 | github.com/maharshkewat-india

PROFESSIONAL SUMMARY

A results-driven Cybersecurity student specializing in Security Operations (SOC), Cloud Security (Azure, GCP), and AI-driven threat analysis. Combines a B.Tech in Cybersecurity with extensive, hands-on project experience in developing Python-based digital forensics tools and AI surveillance systems. Certified in Microsoft Security & Azure Fundamentals, with proven skills in network analysis, IAM principles, and incident response methodologies. Seeking to apply defensive security expertise to identify and mitigate threats in a fast-paced SOC Analyst role.

TECHNICAL SKILLS

- Programming & Scripting: Python, Bash, SQL
- Cybersecurity Domains: Incident Response, Network Security, Cloud Security (Azure, GCP), IAM, Digital Forensics, Vulnerability Assessment
- Security Tools: Wireshark, Nmap, Microsoft Sentinel, Splunk (Learning), Wazuh (Learning)
- Cloud & Platforms: Microsoft Azure, Google Cloud Platform (GCP), Linux
- Data & AI: Data Analysis, Machine Learning, Computer Vision, NLP, Power BI, Tableau
- Developer Tools: Git, GitHub, VS Code

PROJECTS

- Digital Forensics Framework | Python
 - Developed a Python-based framework to streamline forensic evidence collection and documentation for Windows environments.
 - Implemented MD5 and SHA-256 hashing to ensure file integrity and maintain a verifiable chain of custody.

- N-ONE — AI Surveillance System | Python, Streamlit, OpenCV, DeepFace
 - Engineered an AI-powered surveillance project for threat tracking and facial recognition using computer vision.
 - Integrated person-tracking, attendance management, and threat detection modes.
- J.P. Morgan Quantitative Research Analysis | Python
 - Conducted financial data analysis on natural gas prices to develop pricing models and assess risk.
 - Applied quantitative research methods to a loan portfolio to estimate customer default probabilities.

VIRTUAL EXPERIENCE

- Cybersecurity Job Simulation | Mastercard
 - Served as an analyst on the Security Awareness Team, identifying phishing threats and implementing targeted security training.
- Cybersecurity Analyst Job Simulation | Tata
 - Completed practical tasks in Identity and Access Management (IAM), including designing access controls and aligning security with business objectives.
- Data Analytics Job Simulation | Deloitte
 - Performed data analysis and forensic technology tasks, creating a data dashboard in Tableau to derive business insights.

CERTIFICATIONS

- Microsoft Certified: Security, Compliance, and Identity Fundamentals
- Microsoft Certified: Azure Fundamentals
- Information Security Analyst | Skill India
- Network Security Engineer | Skill India
- Artificial Intelligence Fundamentals | IBM

- Multiple course completions from Google Cloud & Microsoft Learn in Cloud Operations, AI, and Data Transformation.

EDUCATION

Bachelor of Technology, Computer Science (Cyber Security)

AKS University, Satna, Madhya Pradesh | Expected 2025

LEADERSHIP

Community Ambassador | Persevox

- Engaged in community building, technical evangelism, and mentorship to promote cybersecurity awareness.
